

RECOVERY

" **Management** - VeriCore has assembled a management and technology team with unparalleled knowledge and experience in the collection industry.

" **Ethical** - Our staff always operates within the parameters of the laws applicable to each specific situation. Compliance with the law is one of our top concerns. It protects us all.

" **Recordings** All collector calls are digitally recorded to ensure the highest level of professionalism. Calls are routinely used for training purposes to drive superior results.

" **Flexible Approach** - We recognize that all debtors are not created equal. We offer our clients the flexibility to specify how each debtor placement is to be handled. Approaches range from simple outsourcing to a national network of field investigators offering personal contact collections and in-depth asset and liability searches.

REPORTING

" **Customized Reporting** We provide reports that help you make decisions. In addition to verbal updates as often or as little as you wish, you will receive a monthly status report via email or fax that gives an in depth snapshot of all of your current debtors. In addition, online access allows for complete transparency.

" **Spreadsheets** In addition to our detailed monthly reports, you will also receive an Excel spreadsheet that contains all of the raw data. This allows you to create your own reports with your own customized parameters.

" **Daily Reporting** VeriCore will notify you DAILY by email or fax of all transactions taking place on your accounts that day. Included in the Daily Transaction Report is an Excel spreadsheet that you can download into your records.

REMITTANCE

" **Weekly Remittance** Our standard practice is to remit to clients on a weekly basis. We will hold the debtor's check for ten business days, then cut a check to you the following Monday. Based on volume, we have a variety of remittance options that we can customize to suit your needs.

" **Contingency** **DISCOUNTED RATES WILL APPLY FOR ALL MIA MEMBERS.**
